OPPORTUNITY NAME: Plastic Supports for Melons

SECTOR: Consumer Goods

TYPE: Sell

DATE SUBMITTED: 12/7/02

OPPORTUNITY NUMBER: RMX20021207505

DESCRIPTION:

A Mexican manufacturer of plastic injection products is offering a new product that reduces the potential for illness caused by the Fusarium Rolphi fungus on melons. This product is a plastic support, manufactured by injecting in an in-house designed high-speed molded "Virgin Polypropylene" with antioxidant additives and UV protection resins.

The product increases the quality of the melon by keeping the melon away from contact with humidity in the soil. The dimensions of the product are as follows: 10 cm Diameter (3.937 inches) and 1.5 cm Thickness (0.591 inch).

The product design allows a useful life of up to seven months in the highly adverse weather conditions of the Arizona desert. Mexican, Central American and European farmers have successfully tested this product.

The company is also able to develop other plastic products and run them in their facilities in Mexico, not only related to agribusiness but with consumer goods and packaging products as well.

Inquiries from distributors are welcome.
